CERTIFICATE

of Completion

RISC-V EMBEDDED FIRMWARE INTERNSHIP PROGRAM

This certificate is proudly presented to:

SATYADUTT MS

has successfully completed the VSD Squadron Mini Core. A structured 5-stage hands-on RISC-V Embedded Firmware Internship covering:

- Firmware architecture & bare-metal design
- Real board bring-up & UART validation
- Peripheral driver library development
- Multi-driver system integration
- Industry-standard engineering documentation

The participant demonstrated clean API-based firmware design, correct hardware-software mapping, and successful execution on the VSDSquadron Mini RISC-V platform.
